### A Little About Us:

King's Poultry Farm is a family owned and operated company. We produce chicken products that are healthy, nutritional, and tasty - naturally! We raise chickens from just one day old chicks to fully grown birds. Once the birds are grown they are transported to our own USDA inspected processing facility, King and Son's Poultry Services Inc. All our chickens are non-GMO, hormone and antibiotic free, and locally hand processed without preservatives! We sell our products to grocery/retail stores, restaurants, and food service establishments- offering a large variety of ground, whole muscle, and sausage selections. Our goal is to provide our customers with only the best quality chicken, directly from us to you!
